

Onboard Online Customers with Ease. Stop Identity Fraud.

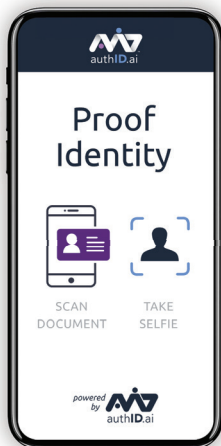

Demand for online commerce is everywhere. But fraud and security threats are also on the rise. Now, it's more important than ever to confirm the identity of new customers. Proof™ delivers trusted identity proofing for remote user onboarding, anywhere in the world.

HOW IT WORKS

Proof harnesses mobile technology, anti-spoofing liveness confirmation and biometric matching of a selfie to authenticated credentials. Proof speeds up customer conversions and helps you weed out fraudulent applicants.

STEP 1

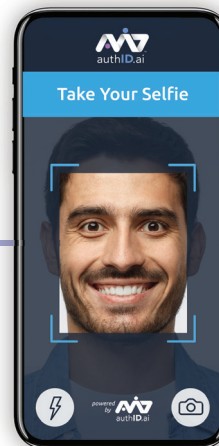

- Consent secured

STEP 2

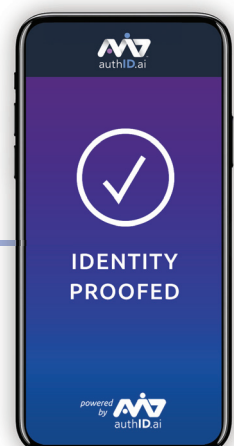

- Official ID scanned
- Identity attributes collected

STEP 3

- Selfie captured
- Active liveness validated

STEP 4

- Biometric matching of selfie to ID photo
- AI-liveness and anti-spoofing confirmation
- Automated document security features check
- Secure API response

Mobile Biometric Identity Proofing

Trusted Remote User Onboarding

Online Identity Proofing with Speed, Accuracy, Security & Trust

Stop identity fraud with high-speed, accurate mobile facial biometric proofing and matching

Strengthen user identity proofing with AI liveness and anti-spoofing confirmation

Step up certainty with automatic authentication of 9000+ government IDs and passports from 200 countries

Auto-populate onboarding databases with OCR of credential data in over 100 languages

Increase trust with North American license authentication and government registry connections

Get started quickly with our i-frame proofing solution, easily launched from any web or mobile platform.

Replace One-Time Passwords & KBA. Leverage Proofed Identities for Seamless Multi-Factor Authentication

Once a proofed identity is secured...why stop there? With a quick selfie, Verified™ delivers mobile biometric authentication that replaces vulnerable one-time passwords and knowledge-based questions. Verified™ reduces costs throughout your enterprise, and delights your customers.
